

Gameplay Programmer | Team Leader

First-Class Honours Games Programming graduate with a unique blend of core **gameplay development** and **technical project coordination**. Focused on **rapid prototyping** and practical problem-solving during **short-form** development. A naturally **scope-conscious** developer skilled in **bridging** the gap between creative **art, design**, and **technical development pipelines**, balancing project **morale** with **practical execution**.

EXPERIENCE

Megablyte

Jan. 2026 - Present

Co-Founder - Technical Producer - Gameplay Programmer

- **Co-Founded** a collective for creative programmers and digital artists to encourage **collaboration** and the **creation** of **tools, games, prototypes**, and **creative technical projects**.
- Act as the team's consistent **technical anchor**, managing **version control** (Github), and establishing **project task pipeline** (Github tasks, Trello, Figma) structures by development area.
- **Engineer** the core structure of **projects, tools**, and **overall technical implementations** (C#, Unity, Godot, OpenFrameworks) to guarantee the culmination of the different development areas.

Grupo Nem-X

Jan. 2025 - Jan. 2026

Associate Product Owner

London, United Kingdom

- Acted as the client-side **technical liaison** between company **directors, internal stakeholders**, and an **external software development** agency building proprietary KPI and data-tracking web applications.
- **Identified critical development bottlenecks** caused by **rapid design changes** outpacing **development velocity**, creating a system to **protect engineering resources** from out-of-date requirements.
- Streamlined cross-team **communication** by establishing a clear separation between front-end design experimentation and core back-end engineering, reducing wasted development cycles.
- **Improved project transparency** and **tracking** for company directors and potential investors by mapping out alignment between **design roadmaps** and **technical deployment schedules**.

SELECTED WORK

Bug Out

Sep. 2024 - May. 2025

Team Lead and Lead Programmer

- **Led a multidisciplinary team** through the full production cycle of a **published title**, managing the **coordination** between the design, art and programming areas.
- Functioned as **Lead Programmer**, architecting the game's core **infrastructure, systemic logic, data flow**, and **tooling** to ensure a workable pipeline between the teams.

Evolve.exe

Sep. 2024 - May. 2025

Solo Developer - Goldsmiths Creative Computing Show

- **Engineered** a complete local multiplayer game from scratch over a **8-month cycle**, culminating in its selection and **exhibition** at a major creative computing show.
- **Designed and implemented** scalable **gameplay mechanics**, including **modular** weapon systems, **physics-based** items, **distinct** game modes, and split-screen local **multiplayer** logic using a **networking framework**

Cross-Disciplinary Hand-Tracking Integration

Mar. 2025 - Apr. 2025

Solo Projects

3D Interactive Hand Tracking Experience

- **Blended computer vision** and **interactive media** by building a custom pipeline that connected an external **Python-based** machine learning **API** to a **Unity** environment in real time.

EDUCATION

Goldsmiths, University of London

Sep. 2022 - Jul. 2025

BSc. Games Programming (Hons) | Grade: 1:1

London, United Kingdom

C#, C++, Object Oriented Programming, Data and Algorithms, Computer Graphics, 3D Modelling, Games Programming, Games Design, Software Design, Data and Machine Learning for Creative Practice, Applications Artificial Intelligence in Software

Game Design Skills Bootcamp

Jun. 2025 - Sep. 2025

Mastering Game Mechanic Design

Remote

Topics: Design Analysis, Mechanic Design Tools, Player Choice Optimization, PvP and PvE interaction, Compositional Design

American School Foundation

Sep. 2005 - Jun. 2022

International Baccalaureate Diploma, AP Computer Science, UNAM / SEP Certificate,

Mexico City, Mexico
